

Novonesis data ethics position

Novonesis has an ethical and responsible approach to the data handled by the organization. Data is key to our innovation-driven, knowledge-based company. It enables Novonesis to innovate, interact and better our world with biology. Novonesis recognizes the key role that data plays in personal lives, society, business and science.

To meet our objectives, we have adopted the following principles:

Security

- We maintain a high level of IT security to protect confidential information, know-how and personal data processed by the organization against unauthorized use and disclosure.

Quality

- We maintain a high level of data quality. That applies to all data, including the data on which the organization bases its decisions, the data which the organization publishes, and the data on which authorities, customers, investors, consumers and other stakeholders rely.

Transparency

- We are transparent with individuals about the personal data collected about them, how it is used and with whom it is shared.

Respect

- We respect confidential and proprietary information, know-how and trade secrets belonging to customers, partners, suppliers etc. and only use it as allowed or authorized. We respect data privacy rights and the integrity and confidentiality of personal data.

Ethical design

- We design and use data processing technologies, including machine learning, artificial intelligence and similar, in accordance with the principles of this position.

Novonesis is leading the era of biosolutions.

By leveraging the power of microbiology with science, we transform the way the world produces, consumes and lives. In more than 30 industries around the world, our biosolutions are already creating value for thousands of customers and benefiting the planet. Our 10,000 people worldwide work closely with our partners and customers to transform business with biology. Let's better our world with biology.
